Arafat Islam

Front-End Developer

ABOUT ME

Progress has driven a self-taught front-end developer. I have always found coding intuitive and have pushed myself to learn the most effective ways to achieve a positive result. I love working with new technologies and collaborating with other developers. I am always willing to learn new technology stacks and embark on my next journey as a web developer and bring value to your company while working on building bigger ideas.

EXPERIENCE

Software Engineer | Fiftytwo Digital Ltd.

August 2020 – present│Dhaka, Bangladesh

- Developing the latest user-facing features using React.js
- Designing a modern highly responsive web-based user interface
- Building reusable components and front-end libraries for future use
- Translating designs and wireframes into high-quality code
- Learn and understand user interactions
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Coordinating with various teams working on distinct layers
- As a React.js Developer, I am regularly involved in conception to completion with projects that are technologically sound and aesthetically impressive.

Front-End Engineer | Pristine Crossing Point

August 2018 – August 2020 │Dhaka, Bangladesh

- Creates high fidelity mock-ups for presentations.
- Build websites using WordPress.
- Provide technical support to clients.
- Design new features for existing websites.
- Created content for blog and SEO purposes to help drive traffic to the site.
- Provided technical direction or support to installation teams during installation, start-up, testing, system commissioning, or performance monitoring.
- Make sure the website content is up to date. Add images and produce literature describing new and completed projects.
- Customize themes to meet clients' requirements.
- Manage a user guide to help clients understand site features and management of website to increase visitor satisfaction.

PROJECT

- **Movie Bear** React | Redux | React Router | Firebase Auth

  This is a movie app which let users view movies and tv show information. Users can watch trailer, login, signup, and mark a movie or tv show favourite. The user's favourite-data is stored using a simple node js server hosted in Heroku and users are only able to mark a media favourite after they sign-in.

   Visit Project: https://moviebear-50388.firebaseapp.com/

- **Shipment Record** React | CSS |

  This is a book-keeping app which let users view their shipment information at a glance. Users can search for shipment, sort shipment, edit shipment name and also view each shipment record in a new window.

  Visit Project: https://shipmentrecord-98c34.web.app/

- **Blog-Post App** Vue | Vuex | Vue-router

  The app allows users to add new post and edit existing posts. While editing a Post, the user is also able to update the category using a multi-select (because a post can have multiple categories). The first item of that dropdown is a "Create New Category" which lets the user create a category on the fly.

  Visit Project: https://shipmentrecord-98c34.web.app/

- **Todo App** Vue | Vuex

  A simple todo application built with vue js and vuex. The application features adding new to-do, editing todos and deleting todos. The application uses local storage to store data.

  Visit Project: https://5effa378018aa36757e21f7f--vuejs-blogpost.netlify.app/

- **ONLINE STORE** WordPress | CSS | HTML

  An online store for a local business that specializes in selling women garments.
  Visit Project: https://eshascollection.phoenixdesign.online/esha/

- **Phoenix Tour** HTML | SCSS | JavaScript | jQuery

   A simple yet elegant website for a travel agency. The Project was developed to showcase the use of Advanced CSS and Sass Flexbox, Grid, Animations, and more!
  Visit Project: https://phoenixtours.phoenixdesign.online/
